

Legal Services and Digital Evidence

When Time Becomes Evidence

Preserves Digital Evidence

- Integrates with existing document management, records, and digital evidence systems.
- Creates an independently verifiable chronology for documents, communications, and digital records.
- Helps preserve the integrity of evidence without disrupting existing legal workflows.
- Creates a shared chronology across documents, communications, and digital evidence.

Strengthens Case Chronologies

- Anchors filings, communications, evidence collection, and investigative activities to cryptographically verifiable timestamps.
- Preserves the sequence of events across investigations, litigation, and regulatory matters.
- Enables independent reconstruction of complex timelines.
- Supports chain-of-custody documentation with verifiable chronological evidence.

Supports Trusted Outcomes

- Improves confidence in digital records and evidentiary documentation.
- Supports legal proceedings, regulatory investigations, and compliance reviews.
- Strengthens confidence in document authenticity and evidentiary chronology.
- Preserves independently verifiable evidence for long-term retention and future review.

Every legal matter depends on establishing what happened—and exactly when it happened. Clockchain creates an independent, cryptographically verifiable chronology that preserves the integrity of digital evidence.

Every Case Has a Timeline. Clockchain Verifies It.
